## TS HARTFORD STYLUS

Soft Stylus Hartford Pen at The Lowest Price

This stylish and unique product combines a traditional pen with a capacitive touch-screen stylus, putting both technologies a "click" away. This new capacitive touch screen stylus has a special conductive rubber tip designed to mimic a human finger when contacting the screen. It is firm enough to enjoy the tactile feedback of the screen, soft enough to glide effortlessly when zooming in or using other "slide" functions

Compatibility:

- ATM
- Airport Kiosks
- GPS & More...
